Nik Rollinson

SOFTWARE ENGINEER | FRONTEND • BACKEND • FULL STACK

Brighton, UK | +44 7365 914 534 | nikrollinson@hotmail.com

PROFESSIONAL SUMMARY

Full stack software engineer with experience across backend services, frontend applications and data pipelines. Skilled in JavaScript, React, Node.js, SQL and API integrations, with work spanning microservices, asynchronous queues and automated testing.

TECHNICAL SKILLS

Languages JavaScript, PHP, SQL, Java, Apex
Frontend & mobile React.js, React Native, web performance optimisation
Backend & integrations Node.js, APIs, microservices, data pipelines, AWS SQS
Testing & delivery Jest, unit testing, integration testing, TDD, Git, CI/CD
AI-assisted development Claude Code and Codex (used daily at Pi Datametrics)

PROFESSIONAL EXPERIENCE

Software Engineer | Pi Datametrics Brighton, UK | Apr 2026 - Present

- Develop and maintain PHP ingestion pipelines that request, normalise and process approximately 2 million search engine results page (SERP) queries daily across engines, regions and daily, weekly and monthly schedules.
- Implement API request batching, rate limiting, retries and asynchronous queue processing to handle third-party provider constraints and failures.
- Manage data validation, tracking statuses and recovery paths for missing, delayed or malformed results, including targeted re-fetches and historical-data fallbacks.
- Maintain result-stabilisation logic that combines daily rankings with deeper weekly snapshots to deliver a consistent three-page SERP view to customers.
- Troubleshoot production incidents involving provider outages and changing SERP formats; restore data coverage and add unit and integration tests to prevent regressions.

Associate Software Engineer | Certinia Harrogate, UK | Apr 2021 - Aug 2024

- Designed and developed microservices, reducing system latency by 20% and improving application performance.
- Led feature development in cross-functional teams, collaborating with UX designers and project managers.
- Mentored junior developers and reviewed code, providing technical guidance on quality and maintainability.

Software Engineer | Self-Employed London, UK | Dec 2020 - Apr 2021

- Integrated customised Salesforce CRM solutions and third-party APIs to extend functionality and synchronise data.

Growth Hacker | Mews London, UK | Sep 2018 - Jul 2020

- Profiled and optimised website performance, reducing page-load times by 70% and improving the user experience.
- Managed Pipedrive and HubSpot CRM platforms and built workflow automations.

Front End Developer | Mews Prague, CZ | Mar 2018 - Sep 2018

- Built a frontend customer onboarding migration tool from scratch, saving hours of manual work per customer.
- Contributed to Agile sprint planning and retrospectives to support iterative development and timely feature delivery.

RESEARCH & PUBLICATIONS

LLM-Generated Samples for Android Malware Detection | Digital, 2026

• Fine-tuned GPT-4.1-mini to generate structured Android malware records, using prompt engineering, schema validation and post-processing to evaluate synthetic-data augmentation across multiple classifiers and malware families.

Publication: https://doi.org/10.3390/digital6010005

EDUCATION

MSc Computer Science | University of Brighton, UK
Bachelor of Business Administration | University of New York in Prague, Czech Republic
